Mario Nguyen

Melbourne, VIC | 0405 484 968 | minhm4003@gmail.com

Experience

Siemens Nov. 2024 – Feb. 2025

Business Intelligence Analyst Apprentice

- Partnered with Finance stakeholders to support annual financial reporting and business analysis.
- Gathered and documented business requirements by liaising with Finance stakeholders and translating reporting needs into analytical requirements.
- Developed Power BI reporting and visualisations to support financial analysis for the Head of Finance.
- Communicated analytical findings and reporting outputs to non-technical stakeholders to support financial decision-making.

Orient Commercial Joint Stock Bank (OCB) May 2024 – Jul. 2024

Data Science Intern

- Supported the development of data-driven initiatives for priority and premium retail banking customers.
- Provided analytical insights to the retail banking team to support the identification and evaluation of potential business partners.
- Collected external data using Python, Selenium and web scraping techniques for downstream analysis.
- Cleaned, processed and standardised collected data using regular expressions, filtering and mapping techniques.

Education

University of Melbourne Mar. 2025 – Presnt

Master of Data Science *Melbourne, VIC*

HCM University of Science Oct. 2020 – Nov. 2024

Bachelor of Information Technology & Computer Science, Minor in Data Science *GPA: 3.48/4.00*

Projects

University of Melbourne Master of Data Science Capstone Project | *4-member teamFeb. 2026 – Nov. 2026*

- Investigated factors associated with longevity across different regions using statistical and data science methods.
- Designed an end-to-end analytical pipeline covering data preprocessing, modelling, interpretation and final Business Intelligence outputs.
- Evaluated feature importance from statistical and machine learning models to identify factors most strongly associated with regional longevity patterns.
- Collaborated with a four-member project team and industry stakeholders to gather domain knowledge, clarify requirements and refine analytical objectives.
- Worked with team members and supervisors through regular project meetings, progress reviews and repository-based version control.
- Developed interactive visualisations and integrated analytical findings into a Business Intelligence product for communicating results to non-technical users.

Technical Skills

Programming: Python, SQL, C/C++
Data Analysis & Machine Learning: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn
Business Intelligence: Power BI, Tableau, Microsoft Excel
Data Collection & Processing: Selenium, Web Scraping, Regular Expressions
Tools: Git, Jupyter Notebook, Visual Studio Code

Volunteer Experience

The Royal Melbourne Hospital (RMH) | *Live Music Volunteer* *Sep. 2026 – Present*

High School Social Work Team | *Logistics Team* *Sep. 2018 – Dec. 2019*
